

**Wir suchen DICH!**

## **Fulltime Java / JEE Backend Developer - Berlin**

We are a young fintech-Startup developing a RESTful payment-API as well as a webapp and mobile applications (iOS and Android). Our payment process adapts the escrow / trust-system to minimize online fraud. While our API will be used by market-places and online shops directly (white-label), our app **PAYLAX** (<https://paylax.de>) targets consumers. The pay & relax GmbH was founded in 2015 in Stuttgart, Germany but we are currently building up an office in Berlin as well. The only thing we are missing is You!

### **Java / JEE Backend Developer (onsite, fulltime)**

#### **You...**

- have a university degree in informatics or you will finish studies soon
- have good knowledge in Java, JBOSS/Wildfly, PostgreSQL and RESTful API development
- have worked with GIT before
- are willing to work onsite in Berlin (Occasional home office is possible)
- speak English and / or German
- can join us at 1st of May 2016

#### **Your tasks include...**

- knowing everything about our application
- constantly improving and extending the features of our application
- building up a successful developer team
- deploying new releases to our integration and production servers

#### **We offer you...**

- the opportunity to bring in your own ideas and help us build an awesome product
- flexible working hours
- a young and highly motivated team

We are excited to meet you!
